

TAN ZHI MING

Data Engineering Undergraduate | Cloud, Automation & Backend Systems

bryanzhiming@gmail.com | +601116596391 | linkedin.com/in/zhimingt看an | github.com/ZHIMING04

EDUCATION

Jan 2023 – Jan 2027

Bachelor of Computer Science (Data Engineering)

Universiti Teknologi Malaysia

- Current CGPA: 3.98

WORK EXPERIENCE

Cloud Database Engineer Intern, PETRONAS Digital

Jul 2025 – Oct 2025

- Automated database backup and monitoring workflows using scripting tools
- Worked with cloud-based database systems (Azure / AWS environments)
- Monitored system performance, CPU usage, and query efficiency
- Supported enterprise-level database operations and security practices

Information Technology Consultant, NexScholar

Dec 2025 – Present

- Optimized database query performance from 46s to 14s (~70%), improving system efficiency
- Designed and deployed scalable backend systems on DigitalOcean cloud infrastructure
- Translated business requirements into production-ready technical solutions
- Implemented deployment best practices to enhance system stability and reliability

Founder, Trainasia Solution

Jul 2025 – Present

- Founded a startup delivering web-based systems and digital solutions
- Developed and deployed full-stack applications using Laravel, PHP, and React
- Designed RESTful APIs and scalable database architectures
- Managed deployment and version control (Git) for production systems
- Ensured system reliability, scalability, and maintainability across deployments

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations
- Microsoft Certified: AZ-900 (Azure Data Fundamentals)
- SQL (Intermediate) – HackerRank
- Artificial Intelligence Fundamentals – IBM

KEY SKILLS

- Cloud & DevOps:** AWS, Azure Pipelines, CI/CD, Terraform, Docker, Linux, Automation Scripting
- Databases:** PostgreSQL, MySQL, SQL Server, Optimization
- Programming:** Python, JavaScript, PHP
- Data & Cloud Tools:** Azure Data Factory, Databricks, Git, REST APIs
- Concepts:** Cloud Infrastructure, System Design, Automation, Agile Methodology

AVAILABILITY

Available for a 10-month internship from September 2026 to June 2027.

PROJECTS

Koo'Q Platform (www.kooq.my)

- Built a verified talent engine platform with 720+ users (300-350 active users)
- Designed backend system and scalable database architecture
- Developed using Laravel, React, and relational databases
- Ensured system performance and reliability in production environment

School Management System (Confidential Client – SMK)

Developed under Trainasia Solution

- Developed and deployed a web-based system to digitalize school operations
- Implemented key modules: attendance tracking and monitoring dashboard
- Designed backend architecture and managed database systems
- Managed version control and deployment workflow using Git
- Deployed and maintained the system in a production environment
- Improved system efficiency and reliability through structured data workflows

Enterprise Azure Data Pipeline Project (Pittsburgh Plate Glass - PPG)

Course Project

- Built a cloud-based ETL pipeline using Azure Data Factory
- Designed data ingestion and transformation workflows
- Integrated multiple datasets for reporting and analytics
- Applied data engineering concepts including orchestration and data movement

AWARD

National Micro Enterprise Pitching Competition (NMEPC) 2025

Recognized for Koo'Q Talent Verification Engine innovation and business scalability proposal
Universiti Teknologi MARA (UiTM) Melaka

Finalist

5th ATMA JAYA BUSINESS AND INNOVATION EXPO 2025 (5th ABIEX)

Selected to represent Koo'Q Talent Verification Engine at international innovation exhibition
Atma Jaya Catholic University, Indonesia

Finalist

LANGUAGES

- Mandarin – Fluent (C2)
- Bahasa Melayu – Advanced (C1)
- English – Upper Intermediate (B2)
